ME3630 M.2 is designed to provide customers with global network coverage and the connectivity of LTE. It delivers 50Mbps-up and 150Mbps-down data rates on LTE FDD networks and can also be fully backward compatible with existing WCDMA and GSM networks.

The M.2 is a natural transition from the Mini Card and Half-Mini Card to a smaller form factor in both size and volume.

A rich set of internet protocols (PAP and CHAP used for PPP connections) and abundant functions (GPS/A-GPS, Remote wakeup, USSD, MMS, SMS) extend the applicability of the module to a wide range of M2M applications.

ME3630 also allows the integration of automotive and other applications requiring assured extended operating temperature range and mechanical ruggedness within the ever-shrinking space inside electronic bays in trucks, automobiles, and other mobile platforms.
